Catalog 2019

# Welcome to the World of **Märklin** my world!

The **Märklin my world** world of railroading offers an age-appropriate entry into the world of railroading with the proven **Märklin** quality. The locomotives and cars are designed for children, are easy to handle, and offer all kinds of play fun right from the start.

The extensive assortment of track and accessories offers endless creative possibilities for getting involved in the world of railroading and experiencing reality in a reduced size! The **Märklin my world** trains are built in H0 Gauge to a scale of 1:87 and they can even be run on Dad or Granddad's model railroad layout..

## **HIGH** lights

- Complete world of railroading with many accessories.
- All of the trains are rechargeable battery or battery powered and include light and sound functions!
- Sturdy childproof construction and design of the trains!
- Independent playing with several trains at the same time!
- Magnet couplers designed for children on all of the locomotives and cars.
- Batteries included.
- Immense, expandable track system!
- Extremely sturdy, tough track!
- Setup and take down of the track is easy as child's play!
- Reliable operation even on a carpet.
- All of the trains are H0 Gauge / 1:87 and therefore usable on all H0 layouts!
- Suitable for kindergarten aged children.

**3+**

**New!**

**Water spray function**  
Manually operated water spray.

**Light Function**

All of the trains are equipped with controllable lights on the front.

**Removable Roof**

The roof can be removed on these cars.

**Magnet Couplers**

Magnet couplers designed for children on all of the locomotives and cars.

**H0 Scale /1:87**

All of the trains are H0 Gauge (16 mm / 5/8") / 1:87 and therefore also usable on all H0 layouts!

**Battery Operation**

These trains are battery operated.

**Rechargeable Battery Operation**

These trains are equipped with a rechargeable battery and a USB charging cable.

**Steaming Smokestack**

Steam generator based on water.

**Sound Function**

All of the trains are equipped with sound functions!  
Examples: horn, station announcement, squealing brakes, or doors closing.

**Important! Here comes the fire station and the water being sprayed.**

The fire department train comes hurtling around the curve with a loud „tattoo taaa“ and you start putting out the fire with the water spray. It's a good thing that your fire station train has the water tank right on board. Now, it's all about spraying water. The helicopter is already for use at the end of the train – it can start immediately and lift off for a rescue.

**For a mega adventure – a fire station**

**29340 Fire Department“ Starter Set**

- Fire station train with fire station alarm and fire station siren.
- Fast charging with rechargeable battery and USB charging cable.
- Operation as easy as child's play thanks to the Märklin Power Control Stick.
- One car with a tank and water spray.
- Container for loading and unloading.
- Additional helicopter as a load.
- Complete set in a fire department look.
- Sturdy and operated with rechargeable battery.

**Sound functions:**  
Fire station alarm  
Fire station siren  
Horn

**More Track, More Fun!**

If you would like to run on still more different routes with your fire station train, you can expand this starter set immediately with the 23300 track extension set.

This set has 28 plastic pieces of track, a car with a water spray, a loadable container, and a helicopter for play fun right from the start. The set also includes a hand controller with three speed levels for forward and reverse.

## 72219 Fire Station

- Complete fire station as a kit.
- Different options for building the kit.
- Fire station tower with light and sound.
- Helicopter landing pad.
- Elevator in the fire station tower.
- Vehicle garage for releasing the fire station vehicles.
- Many additional play functions.
- Fire station vehicle also included.

Batteries are included.

### Welcome to the Fire Station.

Playing will keep on going with this two-story fire station. The fire department train has just rolled in and has to be refilled with water, since the alarm siren is already sounding on the fire station tower. Your fire trucks are racing out of the garage right now. Press the „release button“ and it happens so quickly you can go to the next fire.

A big play set including a fire station vehicle

For a mega adventure – a fire station

#### My Fire Station!

An impressive theme play world that will thrill children results from combining this with the „Fire Department“ starter set (item no. 29340).

## It's Time Now for a Vacation

Pack up your suitcase and don't forget your stuffed animal, because today it's time for a vacation. The Airport Express is already waiting and is just now closing its doors. It rapidly goes uphill in the direction of the airport and you cross over your entire room as an elevated railroad on the elevated railroad pillars that have been set up.

### 29307 „Airport Express - Elevated Railroad“ Starter Set

- Play fun on 2 levels
- Fast charging with rechargeable batteries and a USB charging cable
- Operation easy as child's play thanks to the Märklin Power Control Stick
- Removable roof and interior
- Different sounds and light included
- Very realistic Airport Express look

The set includes 24 sections of plastic track, 14 adapter building blocks, and 72 blocks for play fun right from the start. The set also includes a USB charging cable and the necessary batteries.

The perfect duo for every railroad with the signal (Item No. 72201)!

2x

**72240**  
**Rerailer**

This rerailer consists of a special, curved section of plastic track with guide grooves in the roadbed. These grooves position the wheels correctly on the track when you push a car or even when the train is running at speed. This section of track is to be mounted permanently in the track diagram. Scenery elements for attaching to the track are included for a smooth integration into world of play.

## FAQ Questions about Märklin my world

### 1) Which batteries are needed for the battery trains and are they included with the trains?

The battery-operated starter sets each need 4 each 1.5 volt Mignon AA batteries and 2 each 1.5 volt Micro AAA batteries for the train controller and for the train itself. These batteries are included in the sets. On the rechargeable battery-operated starter sets 2 each 1.5 volt Micro AAA batteries for the train controller (Märklin Power Control Stick) and a mini USB cable are needed. These items are included in the sets. The batteries included are not rechargeable batteries.

### 2) Can rechargeable batteries also be used?

Rechargeable batteries can also be used in the battery holder in addition to regular batteries. When doing this, please note the operating instructions for the charging device being used. A mini USB charging cable for recharging the train is included in the sets for trains with rechargeable battery operation.

### 3) How can I expand a battery starter set in a useful way?

The plastic track extension set (item number 23300) with its preplanned contents offers an easy way to expand a starter set. This track extension set offers different ways to expand or set up a layout. In addition, there are also different individual sections of track, turnouts, and track bumpers. The plastic track can also be used and expanded with the Märklin C Track. This allows you to plan and add to track layouts of your own design. Car sets, individual cars, and accessories round out the theme of railroading and round out the various ways to expand.

### 4) Can the battery trains also be used on large digital layouts, such as those of my father or grandfather?

Since the battery or rechargeable battery trains have their own power supply inside the train, they can also be used on larger layouts with no problem, regardless of whether the layout is being operated analog or digital. In order to avoid collisions, you must remember that several trains cannot be running at the same time on the same track.

### 5) How does the Märklin my world Elevated Railroad work?

The new Märklin my world Elevated Railroad in the proven Märklin quality offers great play fun by playing on two levels. The building blocks are used to build the Elevated Railroad pillars in different heights thus resulting in a grade to take the track to the higher Level 1. The track goes from Level 1 by means of a descending grade back to Level 0. The track sections and blocks are made of sturdy plastic designed for children.

### 6) How are Märklin my world trains controlled?

There are two different types of remote control. The handy wireless infrared remote control with 3 speed levels that can be used to control the light function and sounds. This is also equipped with two frequencies that allow you to control two trains. These trains must have however the same frequencies. Their special shape makes them especially good for children's hands. The second control unit is the wireless Märklin Power Control Stick designed for children. This infrared locomotive controller also has 3 speed levels forward and reverse, as well as 3 sound functions (such as a steam function on a steam locomotive), and control of dual headlights.
